# Leo Med

**REHABED**  
...our ideas your comfort

## HEIGHT ADJUSTMENT

While designing Leo MED we paid careful attention to bed height adjustment. Lowest position - **32cm** provides comfortable usage of bed and also reduces risk of falling. Maximum height - **79cm** - remarkably ease care of lying patients for medical staff.

## SIDE RAILS

Side rails construction is based on three profiles. Folding is done with button located in the upper part of the side rail. Rounded shape of side rails elements together with covered bolting joints increase comfort and safety of use.

## REMOTE CONTROL

Its ergonomic shape provides comfortable one-hand usage and fast access to all bed functions. It is also possible to block individual functions.

**215kg**  
Max. working load

### Basic dimensions:

Overall width x lenght	106 x 215cm
Mattress platrofm width x lenght	90 x 200 cm

Backrest section adjustment

Thigh and calf section adjustment

Auto-Contour function

Trendelenburg position's angle 15°

Reverse Trendelenburg position's angle 17°

Height adjustment 32-79cm

## Adjust design to individual needs

### CASTORS

**Standard:** metal castors, with various diameter and individual brake.

**Optional:** plastic castors with various diameter. For 50mm we provide possibility to order hidden castors. Mobility of the bed is increased by additional options, like axial or central brake.

### BED ENDS

**Standard:** made of disinfection and damage proof CDF Swiss board

**Optional:** made of plastic

### BACKUP POWER

Back-up transformer for emergency power supply is additional equipment.

### CPR SYSTEM

We provide beds with CPR system - as additional function.

### ADDITIONAL EQUIPMENT

Lifting pole, transfusion pole and reading lamp

### FINISHING

Wide range of colors for bed ends.
