Aster

Reclining armchair

TILT ADJUSTMENT

The ASTER recliner can be set in two fixed positions: a seated position and a reclining position. The position-changing system has been designed so that it can be operated without the need to stand up, which is a great convenience. To use the sleeping function, sit in the armchair, hold the armrests, and then lean firmly against the backrest — the armchair will begin to change position. To return to the seated position, hold the armrests and press the lower-leg section down with your legs. The manual adjustment system is safe and reliable. It does not require connection to a power supply, making the armchair mobile and easy to move around easily.

MOBILITY Aster is a fully mobile armchair equipped with four TENTE castors: two directional castors and two castors with brakes. This allows it to be moved easily and conveniently. The armchair's compact dimensions, with an external width of 71 cm, allows it to pass through almost any doorway.

COMFORT

The Aster recliner is equipped with an ergonomic WINGS-type backrest. Its contoured shape allows the head to rest comfortably and safely, while the long, high armrests provide not only comfort but also safety during sleep.

FUNCTIONALITY

In its standard version, the Aster recliner has a side pocket that can be used to store small items. There is also an option to order a back pocket for storing bedding.

	Sitting position	Lying position
Overall w. x h. x l.	68 x 107 x 87cm	68 x 90 x 162 cm
Seat (width x length)	52 x 53 cm	52 x 99 cm
