Wooden bed end with wooden slat

## HEIGHT ADJUSTMENT

While designing LEO "M" Bed we paid careful attention to bed height adjustment. For Leo "M" it is almost 50cm. Lowest position - 26cm (various, depending on diameter of used castors) provides comfortable usage of bed and also reduces risk of falling. Maximum height remarkably ease care of lying patients for medical staff.

## SIDE RAILS

What distinguishes LEO M Bed is side rails system. Three profiles construction, folding by using one button in the upper part, curved shape and covered joints are used to increase safety and comfort of using.
