

Bariatric 2 LUX

Rehabilitation bed

with increased maximum working load

COVERED BED ENDS

Bariatric 2 LUX is a rehabilitation bed designed with the comfort and safety of patients with increased body mass in mind. The reinforced construction and use of special actuators allows for a significant increase in the permissible working load, and the 120 cm wide mattress platform ensures patient comfort. Bariatric 2 LUX rehabilitation bed provides covered bed ends.

- Increased width of mattress platform – **120cm**
- Max. working load – **372kg**, max. patient's weight – **320kg**
- **Autoregression**
- Reinforced, 4-column construction and special actuators
- Four section, metal mattress platform with reinforced internal frame
- Covered bed ends made of laminated board and solid beech wood
- Controlled with ergonomic shaped handset
- Transported on transport adapter
- Wide range of colours
- Warranty: 2 years

Bariatric 2 LUX

Functionality and comfort

WIDE MATTRESS PLATFORM-120cm.

To ensure comfort and safety for patients with increased body mass, mattress platform of the Bariatric 2 LUX bed has been widened to accommodate a mattress 120 cm wide.

INCREASED WEIGHT CAPACITY

Due to the reinforced construction and special actuators, the bed's load capacity is significantly increased.

COVERED BED ENDS

The LUX version is distinguished from the standard version by its covered ends. This design allows for the concealment of the bed's structural elements and actuators, giving the bed a more homelike appearance.

NEW FEATURE

AUTOREGRESSION - automatic retraction of the backrest, significantly reducing the impact of shear forces and pressure on the patient, which are the main causes of bedsores. At the same time, this solution reduces discomfort in the abdominal area, which occurs when positioning on a bed without this function.

TRANSPORT ADAPTER

was developed by our company to enable easy transport of the beds. This solution provides safe and comfortable transport and storage. It also makes it easier to place beds into dedicated rooms and fold them when they are temporarily not used.

320kg
Max. patient's weight

372kg
Max. working load

HOLDERS FOR ADDITIONAL EQUIPMENT

Bariatric 2 LUX beds are standardly equipped with special sockets, located both on left and right side of the head section of bed frame. They enable assembly of additional equipment like lifting and transfusion pole.

HANDSET

Its ergonomic shape provides comfortable one-hand usage and fast access to all bed functions. It is also possible to block individual functions.

RASTOMAT

allows manual adjustment of the calf section.

Basic dimensions	
Overall width x length	135 x 220cm
Mattress platform width x length	120 x 220cm

Adjust to individual needs
